

“WHY ARE THE IMMIGRANTS COMING?”

Many in the US do not understand why so many immigrants are coming, nor do they understand the role that has been played since the late 1970s by US governmental, military, and economic agencies in destabilizing Latin America.

You can help bridge the understanding gap by hosting a teach-in covering this topic. To find good speakers, contact professors of postcolonial studies at your local university or college.

Please also educate yourself. A good place to start is to google the terms “IMF infant mortality rates” or “World Bank infant mortality rates.” We must educate ourselves and put an end to the racist myths that these people’s countries are “naturally” like this.

This was entirely the work of the 1% using the US’s military to set up puppet democracies in which these countries’ social services were gutted and thugs were put in power. It is the same thing the 1% has started doing here over the last 15 years, only they started in countries with darker-skinned people 2 decades earlier. #racism Please host a teach-in and get caught up right away.

PLEASE HOST A TEACH-IN
